VANDERBILT UNIVERSITY

6 Courses

AI Agents and Agentic AI with Python & Generative AI

AI Agents and Agentic AI Architecture in Python

OpenAI GPTs: Creating Your Own Custom AI Assistants

Prompt Engineering for ChatGPT

ChatGPT Advanced Data Analysis

Trustworthy Generative AI

Jun 2, 2025

Stefano Zogno

has successfully completed the online, non-credit Specialization

AI Agent Developer

This Specialization certifies that the learner has successfully completed a comprehensive program in AI Agent and Agentic AI Software Development. The learner has demonstrated the ability to design, build, and deploy intelligent, tool-using AI agents using Python, prompt engineering, and advanced generative AI techniques. With hands-on experience in agent architecture, memory systems, custom GPT development, and trustworthy AI practices, the learner is equipped to function as a professional AI Agent Software Developer capable of solving complex, real-world problems in modern software environments.
